Subject: Progress Update of Group Project

Hi Jai Krishna,

I am writing to provide you with a detailed status update on our progress for the group project so far.

Over the past week, our team has successfully completed the initial research phase and gathered all required reference materials. We have also finalized the core system architecture, drafted the foundational logic and code structure, and started working on the preliminary presentation deck, including the introduction and technical framework sections.

While making steady headway, we did encounter a minor integration bottleneck while merging our separate logic modules, which caused a slight delay in the testing phase. To address this, we have re-allocated tasks to resolve compatibility issues between the components and streamline our workflow.

We are currently on track to complete all remaining testing, polish the presentation slides, and finalize the complete project deliverables by Friday, October 16, 2026. Please let me know if you would like to review the current draft or discuss the integration steps in more detail during our next check-in.

Best regards,

M. Rohith
